

TEACHERS ALLOTTED TO
SCHOOLS IN WAINWRIGHT
SCHOOL DIVISION No. 32

Following is a list of teachers allotted to the various schools in the Wainwright School Division for the coming term:

Albert—Miss D. Knowles.
Alma Mater—Mrs. L. M. Prosser.
Ascot—Mrs. R. Armstrong.
Avonlea—Mrs. Mary L. Prosser.
Battle Creek—Miss Helen Dalton.
Battle Heights—Mrs. M. Sirois.
Battle Valley—Miss H. Heffern.
Batts—Miss Agnes Horien.
Browning—Mr. W. E. Hanson.
Butterville—Miss F. Dewar.
Coal Springs—Mrs. D. Linness.
Crescent Hill—Mrs. O. Sather.
Cresthill—Miss M. C. McLaughlin.
Dolcey—Miss F. Legett.
Edginglassie—Mrs. I. A. Cargill.
Education Point—Miss I. Lambert.
Edgerton Primary—Mrs. McLean.
Edgerton Junior (1)—Miss E. Ford.
Edgerton Junior (2)—Miss Whelen.
Edgerton Intermediate—Mr. J. Ronjom.
Edgerton High—Mr. G. C. Welsh.
Fabyan—Mrs. R. Pickard.
Gerald—Mrs. L. A. Hamilton.
Giles—Mrs. I. Roach.
Glenholm—Miss S. Steffensen.
Green Meadow—Mrs. P. Worrall.
Greenshields—Miss M. Kuefler.
Heath—Miss Helen Melnyk.
Jarow—Mrs. W. R. Meakins.
Killarney—Miss E. Orachski.
La Pearl—Mrs. R. F. Farbridge.
Masco—Miss Evelyn Ford.
McCafferty—Miss L. Metheral.
Melbrae—Miss I. Theroux.
Metropolitan—Miss E. McDonald.
New Ribstone—Miss M. Shotts.
New Ribstone High—Miss P. Callier B.A.
Orbindale—Miss E. Horn.
Park Road—Miss B. Armstrong.
Pelican—Miss B. Belik.
Plaxton—Miss E. Fletcher.
Plaxtonville—Miss M. Wakefield.
Porter Lake—Miss J. Wells.
Prosperity—Miss E. Hill.
Ribstone—Mr. T. P. Moran.
Rodino—Miss Genon Theroux.
Roror—Miss Shelah Rice.
Roseberry—Miss Doris Owen.
Ross—Miss M. Miller.
Saddle Hill—Miss E. Redmond.
Strawberry Plains—Miss J. Sirois.
Sunny Brae—Mrs. M. J. Chase.
Sydenham—Miss Pauline Dixon.
White Cloud—Miss Freda Arthur.
Willow View—Miss Sheila Johnston.
Irma High—Mr. I. S. Reeds, B.A.
Irma High—Mr. D. H. Gunn.
Teacher marked with an * indicate that they are acting in the capacity of supervisor.

EYES EXAMINED:
GLASSES FITTED

Thos. G. Dark, registered optometrist and eye sight specialist, will make his next visit to:
IRMA Drug, 9:00 to 11:00 a.m., Friday, October 12.
VIKING Drug, 12:00 to 2:30 p.m., Friday, October 12.
HOLDEN Drug, 3:30 to 5:00 p.m., Friday, October 12.

"We look forward with high hopes to close co-operation with Britain and the other nations of the commonwealth in the tasks of reconstruction and world peace."
—Prime Minister Mackenzie King.

Eleanor Myer Wins
Division Scholarship

As outlined at the regular meeting of the Wainwright School Division, in April 1944, the scholarship plan that was drawn up at that time has been in operation for the past year.

The results of the plan have been announced and Miss Eleanor Myer of Irma is to be congratulated on being the winning female student. Prize for the male student went to Harry Allwood, Edgerton.

The outline of the scholarship plan which is applicable to rural schools only is outlined below:

The following should be the main conditions governing the choice of the pupils to whom the scholarships are to be awarded:

- In making the award scholarship need, qualities of leadership, and participation in various phases of the schools activities should be considered;
- On or before December 31, 1945, each interested grade nine pupil should file with the secretary-treasurer of the Division an application setting forth personal information concerning himself or herself, including a statement of his or her ambition;
- Such application should be accompanied by a recommendation from the pupils teacher and from one other responsible person;
- At a date fixed by the board sometime in June 1946 the prospective candidates should meet in Wainwright and submit three tests as follows:

- A test of intelligence;
- A test of general information;
- A test on English and reading ability;
- These should be prepared and administered by the superintendent with the assistance of the Secretary-treasurer. The tests might be scored by a superintendent in one of the neighboring divisions;
- The student must make an "A" standing on the grade nine examinations as administered and scored by the Dept. of Education;
- The prospective candidates should be interviewed by a committee consisting of the chairman of the board and the superintendent;
- The award should be made known after the August meeting of the Board after its acceptance of the choice recommended by the committee mentioned above.

The scholarship awarded this year were valued as follows:

- Half \$75.00 when the student registered at a recognized high school on the first day of the school term 1945-46.
- Half at the beginning of the June term provided the pupil continues to do work of a high order as shown by the reports of the principle of the school of which he or she attends.

"We believe that there must be greater freedom for development of international air transport and that this freedom may best be obtained within a framework which provides equality of opportunity and rewards for efficiency."
—Hon. C. D. Howe.

NOTICE

Please take notice that there is to be a National clothing collection from October 1st to 20th sponsored by the Canadian United Allied Relief fund on behalf of UNRRA.

Irma and district residents are asked to bring any used clothing for children or adults that they can spare to the back door of Elford's store where it will be shipped to the proper authorities after the drive is over.

This clothing is for destitute people in Europe and it must be clean and boxed for shipment. Your contribution will be thankfully received.

NEWS OF OUR BOYS

Charles De Tro and Robert Simmermon have started on their University courses in Edmonton. Arthur Peterson will not be admitted to the University for his Pharmacy course until next fall. In the meantime he is serving as an apprentice in Liggett's Drug Store, Edmonton.

William Burrows of Edmonton, formerly of the Canadian navy has been engaged as barber in Harold Barber's shop.

Melvi Knudson is reported as progressing favourably in the University Hospital.

Sgt. Donald Matheson of the Can. Provost Corps is on duty at the Wetaskiwin army camp.

AMA ROAD POLICY
WINS ENDORSEMENT

For many years the Alberta Motor Association has contended that revenue from gasoline tax and motor licenses should be set apart exclusively for the improvement and maintenance of highways. It was recognized that this was a sound request, but no provincial government in Alberta has accepted the principle.

Recently a delegation of Montana business men and road experts who drove over the highways from Fairbanks, Alaska, to Dawson Creek, B.C., and then over the Peace River highway to Edmonton, a total distance of 2,000 miles, expressed criticism of the Alberta section of the road.

Members of the deputation stated that roads in their state at one time were similar to those in Alberta. But through the gasoline tax revenues being devoted entirely to road improvements, Montana has built up a system of paved highways that are equal to the high standards of any other western state.

Through having made a great improvement in its road system, Montana can make a strong appeal to the tourist trade. It is able to do that because road revenues went back into the roads, just what the AMA has been advocating for years.

"Hundreds of Australian boys have married Canadian girls, and altogether, Canada's stock stands higher in Australia today than it ever has before."—Hon. Justice T. C. Davis.

Items From
Kinsella District

Mr. and Mrs. R. Arkinstall and family have taken up residence in their new home in Kinsella.

Mr. Jack Minchin has gone to Edmonton to resume his University studies.

Miss Marjorie Uniloski is here from Calgary visiting her father and sister.

Mrs. Lyle Smart spent several days in the city last week.

Mrs. Lee and Georgina left Kinsella on Monday to make their home in Calgary.

The W.I. meeting will be held in the church on Saturday, Sept. 29th. Roll Call to be answered by articles for Ditty Bags.

TO ALL RATEPAYERS
MUNICIPAL DISTRICT
OF WAINWRIGHT, No. 61

Discount date of 4 per cent on current taxes expires November 1, 1945. Remittance may be forwarded through the mail by bank cheques, money orders or non-negotiable Treasury Branch vouchers.

CHAS. WILBRAHAM,
Secretary-Treasurer.

U. F. A. and
A. F. U. Meet

The Executives of the United Farmers of Alberta and the Alberta Farmers' Union held a joint meeting at the office of the Alberta Farmers' Union in Edmonton and matters of serious concern to farmers were discussed.

The feed and livestock situation was thoroughly canvassed and the situation is regarded as serious.

There is every wish to co-operate in the endeavours to provide sufficient meat to the people of Great Britain and those of other lands who are in desperate need but meat rationing should not be allowed to work to the detriment of the producer, either in the marketing of his livestock or the price he receives for it. We advocate a temporary removal of the embargo against cattle and sheep going to the United States. This would provide an outlet in price and enable the producers to obtain fair market value. In view of the fact that a large number of farmers will not have sufficient feed to finish their cattle, we regard this action necessary immediately.

The Meat Board should be ready to immediately step in and buy surplus stock whenever an over supply tends to lower the market below the floor price.

The measures already adopted to conserve feed supplies are not regarded as adequate. A lot of farmers will not be in the position to buy their feed requirements before 15th September which is the date set for the expiration of the freezing order.

It will be necessary to make a provision to retain all feed grain supplies within the Province until a survey reveals the amounts which will be required and arrangements made to ship these supplies to those districts where they are needed. Resolutions dealing with these matters have been sent to the Alberta Federation of Agriculture for presentation in the proper quarters.

P.S.V. Licenses

It was agreed to press the Gov't to enforce Section 19 of the Highway Traffic Act which calls for a public hearing prior to the granting of new P.S.V. Licenses.

The Government is being asked that the Grain Exchange be closed to all trading in grains and remain closed and that the Canada Wheat Board be converted to a Canada Grain Board to handle all grains.

The disposal of war equipment was discussed and recommendations made that no valuable material should be destroyed.

A press report to the effect that the Gov't was not going ahead with such projects as the irrigation works for Alberta until they were needed as an outlet for labour but were going ahead with beautifying the Ottawa River and the Gatineau district as a war memorial brought a strong protest from the two executives and the Government is to be urged to reverse its decision in this matter.

Rural electrification, another matter of vital concern to the rural population was considered and a committee has been appointed to prepare a brief for presentation to the Provincial Government.

In Ontario the Provincial Hydro-Electric system has been an outstanding success in bringing power to the farms. We can do much the same if we go about it in the right way.

THE WARTIME PRICES AND TRADE BOARD

Need For Permanent Peace

WE HAVE NOW ENTERED what has long been referred to as "the post-war period," and there has been a great deal of speculation as to what would take place in the years following the declarations of peace. Some have feared mass unemployment, business depression and similar disasters. Others have anticipated a new era in which the scientific, mechanical and medical discoveries made during the war would revolutionize our daily lives. Whatever may have been their outlook on these matters, however, the one great hope has been shared by freedom-loving people everywhere that some way might be found to make this peace a permanent one. When the atomic bomb was introduced into warfare, during the last days of Japanese resistance, this hope increased many fold, as it became apparent what the use of this weapon in any future wars would mean to the entire civilized world.

Cannot Remain A Secret Long

At present the secret of this weapon rests with Britain and the United States, but it cannot be expected to remain a secret for any great length of time. Mr. Churchill has predicted that other nations will have it within a period of five years. It is known that Germany had very nearly come upon a means of splitting the atom at the time of her collapse, and there is no reason to believe that other scientists may not be successful in such a discovery at any time. It is also possible that at some time, a substance more accessible and more plentiful than uranium might be found for this purpose. Although there appears to be many possibilities for the use of this great discovery for the benefit of mankind in time of peace, its threat as a weapon of war cannot for a moment be forgotten, and it makes more urgent than ever, the need for some means of keeping the world at peace.

May Be Used To Preserve Peace

Whether the atomic bomb is to be a weapon of peace, or whether it is to be used for warfare of unprecedented horror, remains to be seen. The two which were dropped on Japan have been synonymous with the conquest of territory. The dropping of these bombs, however, may in the future be looked upon as a turning point in history. General Douglas MacArthur in his speech on the occasion of the signing of the Japanese surrender expressed the thought that if we are to survive it will be necessary for the spirit to preserve the flesh. Certainly it is more urgent now than ever before that at least the majority of nations find a way of working together in mutual trust and co-operation and of preventing the occurrence of another war, whose horrors cannot easily be imagined.

Free Speech

Proven To Be An Effective Way Of Preserving Liberty

One feature of Britain's general election which has not been much noticed here, it seems to us, is the lesson for most countries. The lesson of the value of free speech. For as long as we can remember Hyde Park and Trafalgar Square have been synonymous with free speech. There, at any time and under all circumstances, any man, whether he was an atheist, agnostic, Communist, nihilist, or anarchist, or whether he preached the end of the world or the second coming, could orate to his heart's content. Speech was as free as air.

The Communists took full advantage of this. They spoke unendingly at Hyde Park and Trafalgar Square, spoke at almost every street corner in every British city, went up and down the land with their caravans and their pamphlets, published their own newspaper, got the use of the radio, put up candidates for Parliament. With what result? On July 25 the British Communist party elected two candidates. Two. Two in a Parliament of 645 members. What this proves, it seems to us, is that the best way to kill a false or foolish idea is to subject it to the light; to let its prophets talk—to subject their proposition to competition in the free markets of ideas. That has been and is the British idea, and we think it sensible. It is not merely more in keeping with the true spirit of liberty; it is the more effective way of preserving liberty.

Canada, whose devotion to free speech is too often more theoretic than real, might think the matter over.—Ottawa Journal.

GET LESS LIGHT

Part of the visual deficiency of older persons is due to the fact that the pupils of a 50-year-old person admit only slightly more than half as much light as those of a 20-year-old.

Price Control And Rationing Information

Q.—My husband has just been discharged from the army. When he received his ration book there were several coupons removed from it. Are the clerks in the ration office allowed to do this?

A.—Yes. The clerks are instructed to remove the coupons which become valid before he applied for the book. Ration books issued at the present time contain only coupons from the date of application. It is taken for granted that a person does not require ration coupons until he applies for his ration book. Before your husband arrived home he was receiving his rations from army stores and did not require civilian rations.

Q.—Where do I make application for a new truck?

A.—Persons desiring new trucks must make their application through the nearest Wartime Prices and Trade Board Office.

Q.—Have you any leaflet which gives suggestions on how to conserve meat?

A.—Any homemaker who wishes to receive "The Meat Folder," which gives suggestions for making the most of the meat ration, may secure one by writing to the Dominion Department of Agriculture, Ottawa.

Q.—Are the butchers going to have a chart displayed in their shops to show the value of meat coupons?

A.—Yes, there will be charts displayed in all butcher shops to show how many coupons or tokens are to be collected for meat purchased.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

SMILE AWHILE

Lipstick is something that merely adds color and flavor to an old pastime.

Definition of a floor? The only thing that will stop falling hair.

Remember the old advertisement? "The Ham what Am?" Now the question is, "What am Ham?"

Doctor: "Why do you have BF-7640 tattooed on your back?" Patient: "That isn't tattoo. That's where my wife bit me with the car when I was holding the garage door open."

An accused criminal once smirked up at Lord Bacon, trying hard to charm. "Your Highness ought to let me free. We're really kin. For my name's Hogg, and Hogg's kin to Bacon!" "Not until it's hung," said Bacon drily.

"John, I've been lying awake for hours, waiting for you to come home from that wretched club."

"If that isn't just like a woman. And I've been at the club for hours waiting for you to go to sleep."

Husband, answering telephone: "I don't know. Call the weather bureau."

Pretty Young Wife: "Who was that?" Husband: "Some sailor, I guess. He asked if the coast was clear."

We can't have any fun this evening. All I have in my pocket is some small change.

"Well, what do you think it takes to send my kid brother to the movie? A five dollar bill!"

He: I wonder what little bride thinks of when strolling up the aisle to the pealing strains of the marriage hymn?

She: Aisle altar hymn—I'll alter him.

A Chinese visitor said: "Funny people you Canadians. You take a glass of beer, put in sugar to make it sweet and lemon to make it sour; you put in gin to warm you up and let to keep you cool—you say, 'Here's to you and then you drink it yourself.'"

Teacher: "Now, boys, if Napoleon were alive today, what would he be doing?"

Smart Ale: "Drawing an old age pension."

WILL TOUR CANADA With a vast of ex-servicemen and women, the stage show "Home Again" will tour Canada this winter, the Canadian Legion has announced.

High octane gasoline is not a single product, but the blend of a base stock with high quality synthetic hydrocarbons and tetra-ethyl lead.

LT.-GEN. TAKASHIRO KAWABE, Jap vice-chief of staff, looks unhappy and glum as he attends the preliminary peace talks at Gen. MacArthur's headquarters at Manila.

Slow Neutrons

These May Be Used For Production Of Power

An official British report on the atomic bomb in detail reveals that there are two kinds of atomic explosions, one the city-destroying type, and the other only as powerful as ordinary explosives.

The low power explosion has important implications for world safety, in the promise that in producing atomic power for peace the engineers will deal with a force much greater, in destructive capacity, than the accidents in steam and gasoline power plants.

The two kinds of atomic explosions depend, respectively, on fast neutrons for an atomic bomb and slow neutrons for atomic power. The American official report by Dr. H. D. Smith made it clear that the bomb depends on fast neutrons. The British report tells more exactly why this is so.

Fast neutrons are uncharged particles that travel at thousands of miles a second and with energies of millions of volts each. Slow neutrons drop to energies of only a few volts or even fractions of volts, and also to a few miles a second in speed.

But these slow neutrons are about 10 times more effective than the fast kind in producing the splits on cores of uranium or plutonium atoms. Their very slowness prevents their use, in an atomic bomb.

A peculiarity of the atomic explosives, uranium 235, and plutonium is the fact that they are safe, until the instant when more than two pounds are brought together into a single closely-packed mass.

The huge plant in the state of Washington that converts common non-explosive uranium 238 into plutonium uses slow neutrons to produce its transmutation reactions. It is possible to control the slow neutron reactions, so that they are safe from explosions.

Fast neutrons won't even start the reactions of the Washington plant, even when a ton of pure common uranium is concentrated. The fast neutron explosive effect becomes possible only when the rare uranium 235 is extracted from common uranium and concentrated.

A Rare Metal

Mined At Great Slave Lake, It Is In Great Demand

On the lonely, northeast shore of Great Slave Lake there is a small mining camp. The buildings are humble and unimpressive. Yet this location is an important Canadian source of tantalum—a neglected rare metal in demand owing to the new uses found for it.

Tantalum has the peculiar property of allowing an electric current to flow through it in only one direction. It forms a number of important alloys with nickel, chromium, molybdenum, iron and other metals and these alloys are used in surgical and dental instruments. With carbon it forms tantalum carbide which approaches the diamond in hardness and does not melt at 3000 deg. C. Wire made from tantalum is stronger than steel wire. The metal can be easily colored and used in jewellery. It is used in radio tubes.

Recently it has been found that it makes an ideal substance for surgeons to use in the human body to replace portions of the skull or other bones. It has a very high resistance to corrosion and will last almost indefinitely.

Vessel To Palestine

Pacific Coast Steamer Purchased By The Oriental Navigation Co.

The former S.S. Prince Charles, well-known for many years as a Canadian National vessel on the Vancouver-Queen Charlotte Islands run in British Columbia, was sold recently for the second time since leaving the C.N. service.

Her late owners, the Union Steamships Ltd., of Vancouver, who operated the ship under the name of the S.S. Camosun, recently reported she was bought by the Oriental Navigation Company, of Tel Aviv, Palestine. The vessel will now sail among the islands and coast ports of Palestine and the Mediterranean. The ship was built at Ayr, Scotland in 1913.

Margie's a Trouble-Shooter

THIS is Margie. She spends her days meeting trouble and then setting it right. She's one of the most popular girls we know, because she never gets fussed or annoyed.

Girls like Margie can't afford to have nerves. That's why she—and hosts of folks like her—drink Postum. Postum is free of caffeine or any other drug that might disturb heart or nerves or digestion. And Postum is a grand drink. Has an appealing flavor all its own—not like tea, not like coffee, but wonderfully delicious in an altogether different way.

Make Postum your regular meal-time drink! Drink it between meals too. You'll love it.

POSTUM

A Product of General Foods

MEET A CWAC—

When questioned about her job in Ottawa, Sgt. Mary Alice Parker, former school teacher, Kamsack, Sask., replied: "Well, I still can't say much about it, even though the war is over. I worked in the Director of Staff Duties (Weapons), N.D.H.Q., and it was most secret. At first it seemed rather strange not to say anything, even to one another, but we soon got used to the idea. Why, we'd know a girl for months, even knew where she worked, but we didn't have the slightest idea what she did. Our motto was: 'It's better to appear very stupid when questioned than to give out the slightest information that might be of use to the enemy.' Sgt. Parker, coming from a long line of military ancestors, enlisted in the Canadian Women's Army Corps in April, 1942, and after her Basic Training at St. Anne de Bellevue, Que. Posted to the A.G. Branch in Ottawa, she returned to St. Anne's in 1943 with the rank of corporal for a N.C.O. course; at the completion of which she was reposted to the Director of Staff Duties (Weapons), Ottawa, with a rank of Sergeant. "Besides finding my work interesting, Ottawa is a very attractive place in which to work," Sgt. Parker continued, "you seem to be at the very heart of things. There was always something to do or see. I've missed my lunch a good many times in order to see some important personages, such as Madame Chiang Kai-Shek, General De Gaulle, Dutch Royalty and so on, but it was always worth it." Sgt. Parker was presented to the Earl of Athlone during her stay in Ottawa, being one of the three chosen from each of her provinces to be presented to the King and Queen.

"I have enjoyed every moment of my army life and wouldn't have missed the experience for the world," she concluded. "It would like to take this opportunity to say how well I enjoyed living with the other members of the CWAC in Kildare Barracks. It is really a lovely place." Besides her service ribbon Sgt. Parker wears the Jubilee ribbon, which was awarded to her on the 25th anniversary of King George V reign. She is at present at 112 Depot Coy., CWAC, Regina, awaiting her return to civvie street. After a short holiday in Eastern Canada, she intends to resume her position as primary teacher in Kamsack, Sask.

CWAC ENTERTAIN THE BEVERLEY BAXTERS—

In an address to CWAC personnel stationed in London, England, Mr. Beverley Baxter, Canadian born M.P., described the House of Commons in Britain as "The greatest parliament in any time." During the time when invasion seemed inevitable, members were issued with railway tickets to Reading, where an emergency building was in preparation. Never once, during the most trying times in Britain, had Parliament missed a session. Prior to the lecture, Mr. and Mrs. Baxter were entertained by members of the C.W.A.C.

CWAC AND THE LEGION—Any ex-CWAC, providing she has the necessary service, may become a

member of the Legion, for as far as the Legion is concerned, members of the CWAC are service men, too. So, if she's "a person of good character, who has been active service in any of His Majesty's forces," she'll be most welcome. Up until the present time, the number of women who could belong to the Canadian Legion has been small, as Nursing Sisters were the only active members in World War I. But when the women's services in this war are all disbanded, the Legion looks forward to a large number of girls becoming members and taking their rightful place with the rest of the veterans. There's a job, too, for women in the Legion. Problems of home and family are a women's sphere, they will be able to assist in the solution of such problems. Ex-service women can join any branch of the Legion, or if there are enough of them, they can get together and form a branch of their own. Whether they are members or not, the Legion lends a helping hand to discharged service women, but it would be much easier if women could be present at the meetings as a member, so that they would be able to give their ideas in their own right. Women in the Legion will definitely be a good influence.

CWAC Question Mark: Why did Pte. Buttercup refuse to press her husband's uniform? I thought she seemed very much attached to him. Pte. Penelope: She is, but just for rations and quarters, not duty.

GEMS OF THOUGHT

NATURAL VIRTUES

Silver and gold are not the only civil virtues too passes current all over the world.—Euripides.

Prudence is the necessary ingredient in all the virtues, without which they degenerate into folly and excess.—Jeremy Collier.

There never was any heart truly great and generous that was not also tender and compassionate.—South.

To cultivate sympathy you must be among living creatures, and thinking about them.—Ruskin.

Justice and truth make man free, injustice and error enslave him.—Mary Baker Eddy.

Temperance gives nature her full play, and enables her to exert herself in all her force and vigor.—Addison.

Tin was known to the Phoenicians and Romans.

Good Way to Treat. Sore, Itching Piles

If you suffer agonizing torture from sore, itching piles, there is a sure, simple, home treatment with the promise of reliable relief. It costs nothing if you are not satisfied with the results.

Simply get a bottle of Hemorrhoid from any druggist. This is an internal treatment. The medicine is directed to the removal of the cause of piles. Hemorrhoid is a swollen, inflamed, and itchy area of the rectum. It is caused by the accumulation of blood and the resulting inflammation are reduced and the sore, painful membranes are healed. Get a bottle of Hemorrhoid from any druggist. It costs nothing if you are not satisfied with the results.

NOTE: The sponsor of this notice is a reliable firm. Don't believe a Canada for over 25 years. If you are troubled with sore, itching piles, Hemorrhoid must be your remedy. You can't get the small purchase price will be gladly returned.

OUR COMPLETE SHORT STORY—

Amateur Night

— By —
SETH BABITS

McClure Newspaper Syndicate

As the young colored couple left the Harlem theatre, Sam Jones gripped Susan Frank's arm. They strode up the avenue, battling the icy wind that swept up loose papers and created eddies that whirled Susan turned to Sam. "They sure were awful tonight, weren't they?" she asked in a voice softly husky. "Real amateurs."

"Oh, they're all right," Sam allowed generously. "Some got sure powerful voices. Like that girl who won the first prize. I could hear her if I was clean up Lenox Avenue."

"Yeah, she was loud enough, but that wasn't singing. It's remembering. There's more to singing than yellin'. If she can sing, I'm Ethel Waters. I bet I could do much better."

Sam's second sense told him some great idea was germinating within Susan's brain. Having formerly visited the waters of Susan's ambitions with disastrous results Sam decided to avoid the shoals. But suddenly she said, "How'd you think I'd make out, Sam?"

Sam realized his peril. He immediately organized his forces to nip the bud of ambition. He remembered the time Susan entered the Lindy Hop contest with the most distressing result. "Not so good," he countered unhesitatingly. "No, I guess you just wouldn't make out."

Susan frowned. Her arm loosened within his. "You mean to tell me that singer who won tonight is got a better voice than mine?" she said defiantly. "So you don't think I got a voice?"

"Listen. I ain't sayin' you ain't got sounds."

"Yeah."

"You ain't got tones er-er-er that's piffational enough," he smiled at her benignly.

"Zat?"

"What I mean is er-er-er."

"Well, if you ain't the beatness, Samuel Jones. I got a voice and I know it. I can sing twice as good as anyone on that program. My pappy used to say he never heard a voice like mine. An' jus' to show you, I'm goin' to sign up for nex' week."

This, decided Sam, had gone just far enough. The moment had come when he must show his masculine supremacy. Nothin' doin', Susan. I won't have you do that. 'In your boy friend' and I got rights. I won't have you go up there to make a holy spectacle of yourself. You'd get the bell the first minute. Or you'd be razed to death by them guys up on the balcony. No girl friend of mine is gonna do anything 'so crazy-like."

"Holy spectacle! Crazy-like! You got your crust, big boy. From now on you can go get yourself some girl friend 'what's more sane."

Upon arriving at her home, Susan quickly ran up the stairs, never pausing, even to glance at Sam.

Although Sam, during the earlier part of the week, had felt that he could not go to watch Susan meet with fame or failure, he decided later that he would at least like to see her from across the footlights.

The theatre rocked and roared with the critical opinions of the audience. The first amateur, graciously allowed to go through his number, retired to a seat behind the screen to await

the final hour of judgment. Later, by means of applause, the winner of the contest would be chosen.

Amateur Number Two sang exactly four lines of Mother Macchree when her efforts at vocalization were rudely interrupted. A carefully aimed head of cabbage just missed her left ear and landed with a pow upon the floor of the stage.

With much formality the Master of Ceremonies introduced Amateur Number Three. But his efforts at entertainment also met with disapproval.

Noisily the house settled back upon its haunches in preparation for the next victim.

Little pin pricks crawled up and down Sam's spine as the M.C. advanced to the microphone, guiding Susan by the hand. "And next—and next, ladies and gentlemen, we have the pleasure of hearing from Miss Susan Frank."

Susan gripped the rod of the microphone with her right hand and stared out at the sea of faces. The orchestra struck a chord. Susan's voice, husky and devotional, sang out, "My Lord, What A Mornin'."

Then occurred a curious reaction on the part of the listeners. A hush of surprise at the type of song Susan had chosen swept over the hitherto clamoring audience like a tidal wave of silence.

From somewhere up in the gallery a voice rose in holy fervor. "Hallelujah, hallelujah!" Another intoned, "Laud, Laud, Laud, step aside for this child."

"Hallelujah, hallelujah!" Gradually, the entire gallery took up the strain of responses.

Sam's heart skipped a beat. Susan was smiling, and at him. A smile of forgiveness, beauty in its glory.

The song was over. The last hallelujah had been softly pronounced. A hush had fallen upon the theatre. The M.C. advanced to the mike. Susan walked quickly off the stage. Then bedlam broke loose. A rising cadence of handclapping, whistling and foot stamping filled the theatre. The M.C. walked backstage to get Susan.

One of the performers told him she had run out of the theatre, crying.

Sam, leaving, felt someone touch his shoulder. He turned to behold Susan beckoning to him. Warmth flooded their hearts, they were intoxicated at the joy of being together again.

As they turned the corner Susan gripped Sam's arm tighter and pulled him closer. "I guess I was a holy spectacle, eh, hon?" she said, her voice softly husky.

New Appraisal

John S. Knight Cables The Chicago Daily News From Tokyo

Since we have elected to keep the Emperor on the throne I think Gen. MacArthur should have a heart-to-heart talk with his celestial majesty about the standards of sanitation we shall require so long as a single American soldier, sailor or marine is stationed in Japan.

Outwardly there is every sign of co-operation. There is no looting or mob rule in Tokyo.

The word of the Emperor is supreme and these pint-sized hissing killers bow to his will.

In my humble judgment, however, the long-range situation in Japan can be kept in hand only so long as we maintain an iron-fist policy tempered with equity and justice. Don't catalogue the Japanese as quaint, picturesque little folk who dwell in an atmosphere of beautiful cherry blossoms and silken elegance.

I have seen too much filth, smelled more than my share of that peculiar dead cat odor, and looked into too many cold, hard eyes ever to believe that pretty fairy tale again.

CHRISTMAS TREE LIGHTS

Fluorescent Christmas tree lights in various colors will make their bow this holiday season. Bigger than ordinary tree lights, the new bulbs are round and are designed to fit standard incandescent Christmas lighting strings. White when unlighted, they take on pastel tones when illuminated.

The aloe plant, used today for treatment of X-ray burns, was once used for its medicinal properties by American Indians.

Interesting Bits: When the Duke of Windsor was recently on a fishing trip in waters of the Restigouche (N.B.) Salmon Club he took away with him something he wanted badly, the battered old Stetson hat of Indian guide Frank P. Isaac were more 20 years; the Duke replaced it with a new one. . . Premier J. W. Jones of P.E.I. is proud owner of the Hudson's Bay coat of arms, which recently broke the world record for butterfly production in the 305 day class. . . The 18-month daughter of Eldon Campbell, Craik, Sask., wandered away lightly clad, and was found by a Moulton lead party 24 hours later in a dry rough bed miles away, and is recovering. . . George Baitley, Wellington, Ont., district farmer, has a record with threshing 650 bus. of wheat from an eleven-acre field; so heavy binders couldn't shave the grain. . . Claude Running, Clarkburg, Ont., farmer and his horses lost a hair with bees in the orchard; all were stung and in the ensuing melee, Mr. Running got serious cuts to his legs from the mower. . . Rostown (Sask.) high school claims a remarkable record for exam results with 100% pass in grade 12 and 98% in grade 11. . . Unusual phenomenon at Kelowna, B.C., one after millions of butterflies flying in a cloud mass formed northward; they were all black with touches of red, and just like a plague of locusts.

♦ If you like blueberry pie, here's something about the luscious fruit as harvested in Canada. For instance, in the Lake St. John district of Quebec, August weeks are terribly busy for folks, four or five weeks in all being important for the perishable crops. In 1943 blueberries brought a return of \$1,300,000 and in 1944 a total of \$850,000. Men prepare the boxes in which berries are shipped, by evening, each box holds 22½ lbs. and a good picker can fill one in 1½ hours. Most pickers work about eight hours daily, live in tents pitched where wild berries are most plentiful, and once a location is established a picker seldom moves. Best yields of the wild fruit come second and third year after the area has been planted over. At the prevailing price of \$5 a box, and crop plentiful there, prospects were good.

♦ The town of Vegreville, Alta., opened a new 40,000 gorgous swimming pool with appropriate ceremonies. Those responsible in this settlement are regarded largely New Canadian. The project has been in the making twenty years and the pool is part of a \$100,000 park project.

♦ The Lindsay, Ont., Watchman-Warder comes to bat for community bands, saying they help to maintain higher standards of morale, develop young boys and men, influences them in seeking better associations. Take away the band from a community and it suffers accordingly, the editor ends up a final editorial.

♦ The Midland Free Press takes the stand that the government should keep men and women in the forces on the public payroll until it is possible to discharge them into jobs. To bring the home front from overcast and let them loose in a jobless Canada would be inviting serious trouble, the writer contends, and adds that when full post-war employment was promised, it should now be pulled out of the bag.

♦ The Melfort (Sask.) Journal quotes: "Today the farmers are on the verge of a great renaissance. We are beginning to realize that we have a calling and that this calling is to hold the land as a precious trust in order that it will feed the generation of today and future generations yet unborn."

♦ Editorial quickies: The Dufferin Leader at Carman, Man., thinks the large take-away purchase of liquor permitted now encourages immorality, use, much illegal drinking in autos, at public dances, particularly in the rural areas. . . The Cobourg, Ont., Sentinel Star writing of the 9th Victory Loan says if Canadians subscribe generously it will also be an effective way of saying thank you to those who gave so much that democracy might continue to flourish. . . Morden, Man., Times says "A town is as live as its board of trade; a board as live as the individual members. When you ask: is our town up and doing? Ask yourself first."

YOUTH BEING TRAINED

The Moscow radio announced that Russia would conscript 445,000 boys and girls between the ages of 14 and 18 for training in industrial and railway schools. The broadcast said this was the first such conscription after the war and the Government attached special importance to it because "skilled workers are needed in still greater numbers."

IMPORTANT PORT

Singapore Is The Richest Centre In The Far East

Singapore, "The crossroads of the East," is the richest centre and most important port in the Far East. It lies on the principal trade route from Europe to the Far East and astride the shortest route to the South China sea and to the Indian ocean. It handles a large volume of the trade to India, China, Japan, Australia, the United States, the United Kingdom, and Europe, and has developed extensively as the principal shipping and transshipment port for the Malay Peninsula, Siam, French Indo-China, British Borneo, and much of the Netherlands East Indies. In peacetime it is a port of call for all important shipping lines trading between Europe and the Far East, with frequent regular sailings by all classes of ocean-going ships to and from Europe, China and Japan, and to a lesser degree Australia and America. It has frequent regular services of small ships of the coastal type to the ports of Malaya, the Netherlands East Indies, Borneo, Siam and neighboring countries. Work on the great modern naval base, begun in 1924, was completed in 1938.

The ancient city on Singapore island was destroyed by the Javanese waste until the present settlement was founded in 1819 by Sir Stamford Raffles, who leased the site on behalf of the East India company from the Sultan of Johore, by whom the entire island was ceded to the British by the treaty of 1824. Sir Stamford Raffles, influenced by old histories, chose the natural centre to which he foresaw trade would flow from all corners of the world, and promised in 1820 that Singapore should become the pride of the East. The population, about a hundred and fifty when the settlement was founded, is now over half a million. The development of Singapore has been due to British administration, financed by British and Asiatic capital.

Up to the surrender to the Japanese in February, 1942, Singapore was a free port, with no customs, no port, harbor, dock, town or light dues charged. The customs duties for excise were on opium, alcoholic liquors, tobacco and petroleum only. Its trade in normal times consisted of the importation of cottons, cigarettes, machinery, milk, provisions, hardware and other manufactured goods from Europe, America, India and the East Indies, and its exportation in the Malay States, Borneo, Sumatra and other parts of the Malay archipelago; also the collecting of general tropical produce from the islands and jungles and shipping to the consumer markets of the world. The two sides of its trade are complementary: The produce pays for the manufactured goods.

All classes of vessels can approach the port at any state of the tide. Plans were ready at the outbreak of war to increase the wharfage to nearly three miles.

The Singapore Harbour Board provided a large storage capacity. There were extensive oil fuel storage and fuelling equipment and repair facilities. The Singapore Harbour Board reports that during the year ended June, 1938, a total of 3,231 vessels, with a total net registered tonnage of 9,756,410 tons, berthed at the wharves and quays, and 1,597,444 tons of inward cargo and 1,576,559 tons of outward cargo were dealt with.

The urgent need now is to rehabilitate Singapore at the earliest possible moment to supply the allies in Malaya, repatriate large numbers of Allied prisoners-of-war and internees, and to serve as a shipping centre for rubber, tin and other commodities.

The appointment of a British naval commander is expected shortly.

Coastal Defence

How Radar Played An Important Role In Canada

Secrets of Canada's effort in development and production of radar equipment which have been released lately include one small hand-made radar instrument, which in one winter saved Canada more money than years of radar research cost the National Research Council.

This small coastal defence radar unit was made in the summer of 1941 to guide the firing of coastal batteries at Halifax. The set did not "see" an enemy ship near Halifax harbor throughout the war—but it did locate in fog and darkness many vessels which were in danger of running aground and which were promptly directed by radio into safer channels.

OCEAN FLIGHTS

Public interest in the post-war possibilities of the present trans-Atlantic air service continues to grow, according to W. J. Dalby, Trans-Canada Air Lines traffic manager. "The number of requests held by Trans-Canada Air Lines traffic offices for trans-Atlantic passage has now increased to over one thousand."

Earliest writings about soy-beans go back to the time the pyramids of Egypt were being built.

Outstandingly Good

"SALADA" TEA

Returned To Britain

Cases Of Valuable Securities Stored In Canada During War

More than 1,000 heavily guarded cases containing millions of pounds in British securities which had been sent to Canada in 1940 for safe-keeping were loaded at Montreal aboard the British light cruiser H.M.S. Leander recently.

Harbor police stopped all traffic along the waterfront where the ship was lying at an East End dock, and passes were necessary to get into the marked-off area. Newspapermen were among those refused permission to approach the ship, with naval authorities saying that the movement was of a "confidential nature."

A large shipment of gold which came in 1940 also went to the Canadian Mint and to Fort Knox, Tenn., for storage.

The millions of pounds in securities were stored in a specially built vault in the Sun Life Building, Montreal, during the war. The vault was 50 feet below street level and was guarded by Royal Canadian Mounted Police officers.

Serve Another Purpose

British People Will Use Articles Made From Barrage Balloons

The first pre-fabricated aluminum houses have appeared in the city of Bristol, England. These houses took three and a half hours to erect and during that time, water, gas and electricity were laid on. "We took rather a long time," remarked the foreman. "With a little experience we shall be able to put them up more quickly."

Many hundreds of barrage balloons, used in the defence of London and other cities in Britain, have been placed by the British Government at the disposal of industry. Raincoats, rubber aprons and various household goods are now being manufactured from the "demobilized elephants," which have been protecting vital targets from Nazi bombers.

World's Largest Ship

As Troop Carrier The Queen Elizabeth Has Become Memorable

The two-funnelled Queen Elizabeth, the world's largest ship, has fourteen decks and is 1,031 feet in length. She was built in the John Brown shipyard, Clydebank, and had there not been a war she would have joined her companion ship, the Queen Mary, in the north Atlantic passenger service. In February of 1940 the Elizabeth, escorted by six tugs, left the fitting-out basin and proceeded down the Clyde and shortly afterward sailed for New York, arriving on March 7. Her troop-carrying missions have since become memorable.

Laid end to end, 250,000 of the smallest bacteria would measure only one inch.

This Week's Pattern

4759
SIZES
2-6

By ANNE ADAMS

She'll look sweet and pretty in this button-herself frock, Pattern 4759. Make one for school, one for parties; with panties to match.

Pattern 4759 comes in children's sizes 2, 4, 6 and 8. Size 6, frock, requires 1½ yards 35-inch material; panties take ¾ yard.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Are Opening Again

Many Universities In Europe Were Closed During German Occupation

Europe's universities, most of which during the period of occupation were compulsorily closed down, are opening once again. In Holland, the Catholic University of Nijmegen has already resumed work, and the Free University of Amsterdam has started to enrol students. A great rally of Czechoslovak students met last week to open again in the near future—Ottawa Citizen.

TIRED? STIFF?

SLOAN'S

LINIMENT

FOR FASTER RELIEF

WHEN MEAT IS SHORT—MAKE A PIE!—When meat is short and appetites are long, there's nothing better than a Meat Pie! This Beefsteak Pie helps two pounds of beef to stretch around a table of six—with generous helpings for all. And every hot, delicious bite has the full flavor of beef, topped with a crisp nutlike bran pastry.

Beef Steak Pie

2 pounds round steak (cut in 1-inch cubes)
1½ cups sliced onions
¼ cup fat
2 teaspoons salt
¼ teaspoon pepper
Lightly brown steak and onions in fat. Stir in seasonings, parsley and flour; mix well. Add water slowly, stirring constantly. Add potatoes; cover and simmer about 30 minutes. Pour into greased casserole. Cover with Bran Pastry. Frick with fork to show wedge-shape pieces. Bake in hot oven (450 degrees F.) about 20 minutes. Yield: 6 servings (8½-inch casserole).

Bran Pastry

¼ cup bran
¼ cup sifted flour
4 tablespoons cold water (more or less)
Crush bran into fine crumbs; combine with flour and salt. Cut in shortening. Add water, a little at a time, until dough is moist enough to hold together. Roll out on lightly floured board to about ¼ inch in thickness.

Here's a SENSIBLE way to relieve MONTHLY FEMALE MISERY

Lydia E. Pinkham's Vegetable Compound not only helps relieve monthly pain but also accompanying nervous, tired, high-strung feelings—when to functional periodic disturbances. It's one of the most effective medicines for this purpose. Pinkham's Compound helps nature! Follow label directions. Try it!

Company
Irma Alberta

LOCALS

The A.F.U., Irma branch, will hold another dance in Kiefer's hall on October 3rd.

The next regular meeting of the Irma branch of the Canadian Legion will be held on Tuesday evening, October 2, in the Legion hall. All ex-service men are asked to attend.

Next Monday morning you will either get an extra hours sleep or you can get in an extra hours work before your next bedtime, due of course to the fact that we are going to revert to standard time once more.

The W.I. will hold their annual meeting at Mrs. Enger's on Thursday, October 4th. Hostesses are Mrs. Fletcher and Mrs. Hlynka. Roll call will be answered by giving "Suggestions for Bazaar". Mrs. Ott will give a paper at this meeting.

It is with regret we announce the death of Edna, two year old daughter of Mr. and Mrs. Erling Larson from bronchial pneumonia on September 26th.

Please remember Canadian clocks will be set back one hour to standard time next Sunday night, September 30.

Harvesting operations were halted abruptly over a week ago due to rain and snow. Some grain is growing in the stock and some that was not cut was laid flat by the heavy snow fall on Saturday, Sept. 22nd. A large percentage of the grain has not been cut yet in the Irma district.

Mr. Leo Thurston has gone to Winnipeg Man., where he will attend St. John's College for the present term.

A Young People's Society of the United Church has been formed in Irma. Ross McFarland is the President and meetings will be held every second Tuesday evening.

Legion members are asked to keep in mind the next meeting in Irma on Tuesday evening October 2nd, at 8.30 p.m. All ex-service men are cordially invited to attend.

Mr. Clarence Stone was in Irma for a visit last week.

Mr. H. E. Parke returned home from his work last week on account of the illness of his wife.

Miss Amy Wiese was home this week after receiving her discharge from the RCAF Women's Division and has now returned to Edmonton where she is starting on a University course.

Mr. William Greer of the Regina Police force visited his parents, Mr. and Mrs. G. W. Greer and other relatives during the past week.

Rev. E. Longmire and daughter Mrs. C. G. Carter visited in Irma last week.

Rev. H. W. Inglis motored to Edmonton last Wednesday to attend the Moderator's Convention being held this week.

HOW CROP ROTATIONS PAY

Experimental Farm News

There is a common belief that the rotating of crops is not profitable on the Canadian prairies, although considered essential in eastern Canada and Europe. Investigations at the Brandon Experimental Farm and on dominion substations in Manitoba has definitely proved that the alternating of mixtures of grasses and legumes with grain crops and periodic summer-fallows is more profitable than alternating grain and summer-fallow, says M. J. Tinline, superintendent at the Brandon farm.

In the first place weeds can be controlled with much less cultivation where the land is in sod for two years out of six than where only grain is grown. The growing of the two crops reduces labor in seeding, and lengthens the harvest season because the hay can be removed in July and grain in August and September; also the period for preparing the land for crop is extended. Sod land can be broken in early June, thus reverting to the practice so profitable to the pioneer settlers. Cultivation of the sod land can often be done when wet weather makes the working of ordinary fine textured summer-fallow difficult.

Farm planning is greatly simplified once a good rotation is established. However, changing from grain growing to systematic cropping creates a number of problems that have to be solved. The staff at the Brandon experimental farm will be prepared during the coming winter to plan rotations for farmers who furnish the necessary details regarding their farms.

Irma Times

E. W. CARTER, Local Editor

WARN MOTORISTS OF DEADLY MONOXIDE

Deadly dangers of carbon monoxide give cause for fresh warning to motorists at this time of the year, according to officials of the Alberta Motor Association.

Recently, there have been reports of deaths in different parts of the province from these poisonous fumes. In one instance, deaths of two car occupants were reported.

More old cars now are appearing on the highways, due to the abolition of gasoline rationing. That condition probably will prevail for some time, which calls for extra care.

Car experts advise that every care be taken to guard against carbon monoxide. When starting the car up in the garage now that colder weather can be expected, make sure that at least one window is open to permit the flow of fresh air. Have the car checked for any defects and thus check any poisonous fumes. Guard against deadly carbon monoxide in every way possible and reduce the death toll.

Loans to Farmers Under New Act.

D. M. McRae, Administrator of the Farm Improvement Loans Act, has announced that the first million dollars in loans has been made by the chartered banks to farmers under this new Dominion legislation.

Loans for water supply dug-outs in Alberta, pre-fabricated houses in Saskatchewan and tobacco kilns in Ontario, are illustrative of the wide variety of uses which farmers are making of this Act.

While the greatest number of loans have been made by banks so far for the purchase of farm implements, loans for the construction, repair and improvement of buildings are in demand and show every indication that they will be made in greater numbers as soon as material and labour become more generally available.

NO JEEPS, NONE LIKELY (Montreal Gazette, Aug. 11th)

Plagued by tens of thousands of requests, War Assets Corporation came out yesterday with these salient facts in relation to itself and the jeep:

1. We have no jeeps for disposal.
2. We never had any.
3. We don't expect to have any for a long time, if ever. By phone, letter and the spoken word, tens of thousands of citizens have been harrying the corporation with requests for jeeps to be put into civilian use.

The corporation charged with ridding Canada of her excess war materials, can only say its three lines, point a finger at a certain motor car concern that plans a civilian-version jeep soon and advise them "Try them".

ELEVATORS AT INLAND NEARING COMPLETION

The three elevators at Inland destroyed by fire some weeks ago are being re-constructed and one of them, the National, will be ready to receive grain about October 15th. The Midland and Pool will both open about December 1st.

"This, indeed, is and forever will return to be a day of remembrance, thanksgiving and prayer—remembrance of what we have done and of what we have sacrificed, thanksgiving for the termination of the most devastating war in human history, and prayer that it may never happen again."—Hon. Dr. Liu Shih

"Air transportation will play an ever-increasing part in international relations."—Air Chief Marshal Sir Frederick Bowhill.

RADIOGRAMS

T. A. Shandro

Persistence and determination on the part of a group of young Edmonton dramatists paid off when word was received that two of their half-hour dramatic productions had been accepted for network broadcasting. Opening broadcast was heard Thursday, September 20th at 9.00 p.m. over CJCA. The play titled "Sidewalk Serenade" is written by Luke Stewart and was presented by the CJCA Radio Theatre under direction of Doug Homersham.

The cast consisted of Jack Dixon, Marguerite Macdonald, Frances Garnes, Jack Mather, Farnham, Howarth, Newton Shortcliffe and Allan Macdonald.

CJCA Radio Theatre was organized by Doug Homersham, member of the staff, about two years ago. Their productions have been broadcasted over CJCA on numerous occasions, especially in support of Victory Loan campaigns, welfare drives, and in support of Canadian American goodwill. This was the first broadcast over a network.

The next production will be heard Thursday, September 27th over CJCA at 9.00 p.m. This production is titled "The Morning Stars" and is written by David S. Catton.

CABLES FOR THE FAR EAST

To All Newspapers in Alberta: And to next of kin of civilian internees in Far East:

We have received the following wire this morning from our Red Cross Enquiry Bureau, Ottawa.

Canadian Red Cross have arranged with concurrence of government to send and receive one free cable between Canadian and Civilian internees in far east and next of kin in Canada.

These are to be sent to bureau by airmail for transmission to Manila.

Message of ten words exclusive of address name sender to be submitted on personal cable forms in duplicate omitting branch certificate and verification.

British next of kin in Canada may be included.

Kindly apply your nearest Red Cross branch if a cable is to be sent. Personal cable forms will be immediately forwarded for completion by CANADIAN RED CROSS SOCIETY, Alberta Division, D. H. Tomlinson, Commissioner.

"Canada is getting back better men and women, than those who do come back, than went over."—General H. D. G. Crerar.
